Main lines of research:

- ❑ **Research topic 1** : Optimized operations management and supply chain management
- ❑ **Research topic 2**: Embedded Systems and Telecommunications
- ❑ **Research topic 3**: Intelligent energy networks, electrical engineering and energy efficiency.
- ❑ **Research topic 4**: Environmental sciences and sustainable development.
- ❑ **Research topic 5**: Calculations of numerical structures and methods.
- ❑ **Research topic 6**: Modeling and simulation of mechanical systems and eco-design
- ❑ **Research topic 7**: Smart industry and smart mobility

Laboratory in Numbers :

Keywords : Engineering, industrial management, innovation.
