

## **Call for papers**

# **The first International Congress On: Physical Activity Sciences and Emerging Technologies ICPASET'24 May 23-25, 2024, Settata - Morocco**

---

**Prof. El Mostafa RAJAALLAH**  
ICPASET'24 Congress Chair

Traditional sports practice has historically relied on physical strength, with traditional physical training influencing athletes' activity and health in the long term. In the era of digital technology and artificial intelligence, coaches are now utilizing data-driven scientific methods to optimize practitioners' capabilities, strengths, and weaknesses.

In this context, the First International Congress on Physical Activity Sciences and Emerging Technologies (ICPASET'24) will provide an opportunity for research scholars, delegates, and students to interact and share their experiences, knowledge, and synergy in technology applications. It will be held on 23-25 May, 2024, in Settata, Morocco. The three-days congress will feature invited keynotes and oral presentations.

The Congress aims to serve as a platform for scholars and practitioners from academia and industry to disseminate the latest innovations and research advancements in the field. This event is organized by the Institute of Sports Sciences at Hassan 1st University, in collaboration with the affiliated laboratories:

- Mathematics, Computer Science, and Engineering Sciences (MISI),
- Sciences and Technologies of Health (STS).

Our main objective is to integrate emerging technologies to enhance performance in various fields related to physical activity. The congress seeks to showcase cutting-edge

technologies and foster collaboration among educators, researchers, and experts in scientific disciplines related to physical activity, providing multifaceted perspectives to contribute to a well-rounded future for sports and physical activity at both national and international levels. The congress will encompass a range of topics, including but not limited to:

1. Technology for improving sports performance:
  - Artificial Intelligence.
  - Business intelligence
  - Data analysis.
  - Big Data.
  - Data Visualization Techniques.
  - Mobile Application Development.
2. Health 4.0 and sports practice.
3. Digital governance of sports organizations.
4. Similar topics: Mathematics, Computer Science, Engineering Sciences, Healthcare, Management, Sport...etc.

The participation in this scientific congress is open to everyone, **free of charge**, promoting interdisciplinary collaboration and encouraging diverse perspectives to contribute to the development of physical activity and sports sciences.
